SUBJECT INDEX

activated carbon		<i>Brassica juncea</i>	
for detoxifying rapeseed, 107		proteins, 155	
aging		calcium	
chicken muscle, 59		in chicken muscle, 59	
alfalfa		carbohydrate	
protein fractionation, 16		in birch syrup, 28	
protein characterization, 38		cereal	
<i>Allium cepa</i>		blended with rapeseed, 93	
water sorption in, 189		cheese	
amaranth (FD & C Red No. 2)		test for milk giving fruity flavor, 31	
stability of subsidiary dyes, 173		chicken muscle	
ammonium sulfate		calcium and zinc during aging and thaw	
as a basis for protein fractionation, 16		rigor, 59	
ascorbic acid		effect of zinc ions postmortem, 62	
retention from hospital meals, 55		cocoa	
beef		microbiological safety, 177	
<i>E. coli</i> levels, 53		colour additive	
bending test		subsidiary dyes in amaranth, 173	
for measuring spaghetti strength, 34		colour	
<i>Betula populifolia</i>		egg colour and protein content, 99	
composition of syrup, 28		connective tissue	
biotin		microstructure in cut meat, 204	
daily intake, 71		cooking	
birch syrup		effect on glucosinolates, 50	
carbohydrates and minerals, 28		cruciferous vegetables	
		effect of cooking on glucosinolates, 50	

- crystallization
 - of hydrogenated rapeseed oil, 194
- dehydrated food
 - moisture transfer, 102
- detoxification
 - of rapeseed protein, 107
- disulfide bonds
 - in soy bean, faba bean and rapeseed, 45
- E. coli*
 - in bovine feces, 53
- eggs
 - protein and colour, 99
- elaidic acid
 - incorporation into lipids by rats, 169
- electrophoresis
 - of plant proteins, 38
- extrusion
 - soy texture, 1
- F.M.C. pea tenderometer
 - action and standardization, 87
- faba bean
 - amino acids, 97
 - protein characterization, 38
 - protein fractionation, 16
 - protein quality, 97
 - sulfhydryl groups and disulfide bonds, 45
- fatty acid-deficient rats
 - incorporation of oleic and elaidic acids into lipids, 169
- feces
 - E. coli* levels in beef, 54
- firmness
 - of cooked spaghetti, 142
- flavour
 - fruity flavour in cheese, 31
- freeze heat peeling
 - of field tomatoes, 209
- fruit
 - water sorption isotherms, 12
- gelation
 - of sunflower pectin, 113
- grape
 - patulin production, 148
- hospital meals
 - ascorbic acid retention, 55
- immunochemical
 - identification of soya protein in meat mixtures, 124
- legume
 - blended with rapeseed, 93
- legume protein
 - in imitation milk, 117
- light
 - prevention of quality loss in milk, 152
- lipids
 - in potatoes, 134
- meat
 - blended with rapeseed, 93
 - identification of added soya protein, 124
 - microstructure when cut, 204
- microbiological safety
 - of cocoa, 177
- microstructure
 - of cooked spaghetti, 180
 - of cut meat, 204
- milk
 - imitation using legume protein, 117
 - prevention of light-induced quality loss, 152
 - test for fruity flavour in cheese production, 31
- minerals
 - in birch syrup, 28
- moisture transfer
 - in dehydrated food, 102
- molecular weight
 - automated determination, 162
- mustard seed
 - proteins, 155
- mycotoxin,
 - patulin, 148
- odor
 - of hot rapeseed oil, 66
- oil
 - crystallized from rapeseed, 194
- oleic acid
 - incorporation into lipids by rats, 169
- onion
 - water sorption in, 189
- pantothenic acid
 - daily intake, 71
- pasta
 - quality in relation to wheat protein composition, 129
- peas
 - tenderness evaluation, 87
- pectin
 - acidic isolation from sunflower seed, 74
 - gelation characteristics from sunflowers, 113
- peeling
 - of field tomatoes, 209
- Penicillium roqueforti*
 - patulin production, 148
- plant protein
 - new protein fractionation method, 16
- polymerization
 - in plant protein, 45
- population limits,
 - estimation of, 166
- potatoes
 - lipids, 134
- protein
 - composition in wheat, 129
 - from legumes in imitation milk, 117
 - from mustard seed, 155
 - levels in egg yolk, 99
 - polyacrylamide gel electrophoresis, 38
- protein evaluation

- using *Tetrahymena pyriformis*, 82
- protein fractionation
 - by solubility differences in ammonium sulfate, 16
- protein quality
 - faba bean, 97
- rapeseed
 - crystallization of hydrogenated oil, 194
 - nutritive value, 92
 - protein characterization, 38
 - protein detoxification, 107
 - protein fractionation, 16
 - sterols in low-erucic acid oil, 219
 - sulphydryl groups and disulfide bonds, 45
- rapeseed oil
 - odor on frying, 66
- Saskatoon Berry
 - extract by disintegration-diffusion, 216
- soy protein
 - extruded texture, 1
 - immunochemical identification in meat mixtures, 124
- soybean
 - protein characterization, 38
 - protein fraction properties, 7
 - protein fractionation, 16
 - sulphydryl groups and disulfide bonds, 45
- spaghetti
 - evaluation of firmness when cooked, 142
 - stickiness and microstructure when cooked, 180
 - strength measured by bending test, 34
- sterols
 - in low erucic acid rapeseed oil, 219
- stickiness
 - of cooked spaghetti, 180
- strength
 - spaghetti, 34
- sulphydryl groups
 - in soybean, faba bean and rapeseed, 45
- sunflower seed
 - acidic isolation of pectin, 74
 - pectin, 113
- Tetrahymena pyriformis*
 - use in determining nutritive value of food, 82
- texture
 - extruded soymeal, 1
- thaw rigor
 - chicken muscle, 59
- thermal stability
 - of subsidiary dyes in amaranth, 173
- tolerance intervals
 - for estimating population limits, 166
- tomatoes
 - peeling by freeze heat method, 209
- Tower rapeseed
 - nutritive value, 92
- ultracentrifugation
 - in automated molecular weight determination, 162
- ultra violet scanner
 - in automated molecular weight determination, 162
- vegetables
 - effect of cooking on glucosinolates, 50
- vitamin B12
 - daily intake, 71
- water
 - sorption isotherms in fruit, 12
- water sorption
 - in onion, 189
- wheat
 - protein composition and pasta quality, 129
- whey
 - in production of baker's yeast, 78
- yeast
 - production using whey, 78
- zinc
 - in chicken muscle, 59
 - effect on chicken muscle postmortem, 62
